

Animal Enrichment Log

Providing daily enrichment for animals is extremely important for their mental and physical health. Logging their response is also important to determine if the enrichment is something they enjoy or if you need to change something next time. After watching our enrichment Live Broadcast on March 30th, develop enrichment for an animal in your home and rate their response on the table below.

Animal Name	Species	Enrichment	Response (rate and explain)

Response Rating:

0-Animal did not go near it or engage it at all

1-Animal sniffed it but did not interact with it

2-Animal interacted with it a little but then left it alone

3-Animal loved the enrichment, interacted with it, and spent time with it
